(21) Application number: **10220702**(71) Applicant: **IMOTANI:KK**(22) Date of filing: **04.08.98**(72) Inventor: **IMOTANI MITSURU****(54) COOLER BOX****(57) Abstract:**

PROBLEM TO BE SOLVED: To provide a cooler box whose table areas are made wider than those of conventional ones and which is made easier to be used than ever.

SOLUTION: This cooler box has the shape of an open top type rectangle- parallelepipedic container and is provided with tables 8, 9, which are flapped to be developed and horizontally supported, on outside surfaces of four sides of a container main body 1 having heat-insulating materials provided inside an outer circumferential wall thereof. When the tables 8, 9 are unused, they are designed so as to be held in a suspended state along the outside surfaces of the four sides of the container main body 1. Recesses 9a for cup holders are preferably provided in at least one of the tables 9 provided on side surfaces on the side of shorter sides of the container main body 1. It is also preferable to provide a lid 2 detachably at an upper part of the

container main body 1 and to provide a handgrip 7 to the lid 2.
